Subject: Support the environment

To whom it may concern:

We too - Liz and Doug McKnight - urge the Islands Trust to return to their original mandate to preserve and protect the environment and make your policy decisions through that lens. If not, we will be victim to increasing densification, and human demands on the natural resources and ferry services. We are at very real risk of destroying the attributes about the Gulf Islands and the reason why many of us moved here. Once gone, it can't be restored.

We are not writers but we are saying as best we can that we are very worried about the future of e environment on Gabriola.

Sincerely
Liz and Doug McKnight
