Subject: community verses environment

to the Islands Trustees,

I strongly believe your mandate should be to look after the environment, to protect and preserve.

You cannot waver under the pressure of affordable housing. As more people move into our islands and area, affordable housing crisis will be ongoing.

I understand you are writing new bylaws and I would be very happy to see one which protects trees on private properties. we are stewards of the land, not owners.

faithfully,

Suzanne and Gary Campbell
