Subject: Policy statement first draft

To Whom it may concern,

This letter is to inform you that we are against the first reading of the new Islands trust policy statement. We feel that it is imperative that more time be given for consultation with part time and permanent residents of Mayne island. We have only been made aware of these changes in the past few days and they will have a large impact on the lives of Mayne islanders.

We have been property owners on Mayne island for 50 years. During non COVID times, it would be common practice to hold community meetings and engage the community in discussions on these important issues. Unfortunately with restrictions on gatherings, even regular get togethers with neighbours and friends has not been able to happen. Word of mouth has been slow. More consultation is needed.

Please delay the reading of the first draft of the policy statement until we have all had a better input.

Jack and Merelyn McAllister
