Subject: We protest your desire to:

Restrict the agricultural activity on our rural island Restrict or interfere with tree cutting on private property and milling of the wood Deny docks to an island where access is by water

Islands trust is attempting to overreach their mandate and interfere with areas governed by federal and provincial laws and legislature. We do not support an increase in the budget for islands trust, the hiring of consultants, nor the increased bureaucracy proposed.

In fact, with nearly 12,000 population on Salt Spring island, we are not well served by the tax dollars we submit and rely on volunteers and donated monies for services that should be administered through a municipality .

Janet Cunningham
