Subject: TPS Survey

Hello, I'm ready to let you know that I am unable to make any sense of the TPS survey you posted for Public input. Was this intentional? it certainly does not seem to be created for the end user.

From what I can glean, the new TPS will not advance the ecological mandate of the islands trust (question 23). I find this unacceptable.

I heard you to release a new survey that the layman can understand and respond to.

Sincerely,
Karen Clemson
