Subject: Crystal Mountain Society Proposal

Dear Trust Committee members,

I am writing to express my complete support for the rezoning of the Crystal Mountain Society property on North Galiano Island. I have been able to study the plan and after having the opportunity to listen to the issues and their answers I feel confident this is a very good direction for both the island community and Crystal Mountain.

Crystal Mountain Society has done so much good for both local Islanders and those that have been able to come to visit and work on person growth. In these difficult times in the world, such a dedication to the benefit to all is an admirable goal. We are fortunate to have such an honorable organization on our beautiful island.

The society is very aware of the need to respect and maintain the sense of the community while offering a low impact way for others to come to partake in the natural beauty of the island for spiritual and education exploration. The society is dedicated in protecting the natural environment that is so important to us all. The proposal is very well thought out and address' both these issues. Keeping a sustainable and balanced view of how people and nature can ideally work together.

I am certain that a covenant on the title along with most of the land being rezoned to the Nature Protection designation will without a doubt provide protection for the environmental stability that we all want for future generations.

I strongly support the approval of their proposal and look forward to having them as neighbors for many years to come.

Sincerely,

Laurel Joy Jacobson
