Dear Local Trust Committee members,

We are writing to you to express our support for the rezoning proposal presented by Crystal Mountain Society.

In June 2016 we have purchased the house [REDACTED] in the very close neighbourhood of the Chrystal Mountain property. We knew of Crystal Mountain Society's application to rezone and support it fully.

This proposal has been shaped with great respect for the OCP and is responsive to the values important to the community.

We are confident that a covenant registered on title, along with the majority of the land being rezoned to the Nature Protection designation, will provide protection for forest ecosystems for future generations. On this bases we have purchased the house.

This proposal is sensitive to the character of island life and we are convinced that it represents an asset to Galiano community.

Yours sincerely,

Eva Gohl
