Dear Dan Rogers,

Crystal Mountain Society Rezoning Proposal

After reviewing the Petition regarding Crystal Mt rezoning proposal and the Society's response, I have decided to support the Society's proposal. I was once opposed to their proposal, but they have complied with the changes demanded of them.

While it is one's right to oppose the rezoning, I am concerned that those who signed the petition were presented with a preamble containing - whether intentional or not - distortions, inaccuracies and red herrings. A valid position should never require more than clarity. What impact does such a petition have on the decision-making process?

Regards,

Kendall Kyle
