SUBJECT: LUB Review Project – Proposed Bylaw Nos. 223, 224, & 229

RECOMMENDATIONS

Draft motions are included throughout the staff report for the North Pender Island Local Trust Committee's (LTC) consideration and also in the 'Alternatives' section. The draft motions in this staff report are amendments to proposed Bylaw No. 224 and 229; no amendments to proposed Bylaw No. 223 are recommended at this time. If the LTC wishes to amend these bylaws, second reading must be rescinded first (see Alternative 1), amendments can be made (motions throughout the staff report), and then the bylaws be read for a second time as amended (see Alternative 3).

REPORT SUMMARY

The purpose of this report is to provide information on the final topics requested by North Pender LTC for the Land Use Bylaw (LUB) Review Project.

BACKGROUND

Background information regarding the project, staff reports, Discussion Papers, PowerPoint presentations, correspondence, and the Project Charter can be found on the North Pender Project webpage: <https://islandstrust.bc.ca/island-planning/north-pender/projects/>.

At the January 20, 2023 LTC special meeting the LTC passed the following resolution:

NP-2023-07

It was Moved and Seconded,
that the North Pender Island Local Trust Committee (LTC) schedule a Special Meeting to discuss further decisions and next steps for the Land Use Bylaw Review Project.

CARRIED

Summary of Proposed Bylaws

Bylaw No. 223

The proposed Official Community Plan (OCP) amendment Bylaw No. 223 is attached to the staff report. Proposed Bylaw No. 223 would support and enable the amendments to the Land Use Bylaw in Bylaw No. 229.

Bylaw No. 224

Proposed Bylaw No. 224, if adopted, will replace the Land Use Bylaw (LUB) No. 103. Proposed Bylaw No. 224 is attached to this staff report and will be posted to the project webpage.

Bylaw No. 229

Proposed Bylaw No. 229 includes amendments to the Land Use Bylaw that require enabling policies in the OCP. Proposed Bylaw No. 229 is attached to the staff report.

The North Pender Island LTC gave first reading to proposed Bylaw Nos. 223, 224 and 229 on May 6, 2022, the Policy Statement Directives Checklists were endorsed, and second reading was given on September 1, 2022.

Further Amendments

If the LTC wishes to make amendments to proposed Bylaw No. 223, 224, or 229, Second Reading for the bylaw must be rescinded prior to making amendments. The process to amend a bylaw are:

1. Rescind Second Reading by resolution – See Alternative No. 1
2. Make amendments to bylaw by resolution – See Alternative No. 2 and motions throughout the staff report.
3. Give bylaw Second Reading as amended by resolution. – See Alternative No. 3

ANLYSIS

1. Outhouses

Outhouses, also known as a 'privy', are regulated by the Sewerage System Regulation by Island Health. The intent of the regulation is to regulate sewerage systems for residential use of a maximum size. The Sewerage Disposal Regulation prior to 2004 did include, by definition, a privy to be a sewerage system. However the current Sewerage System Regulation, adopted in 2004, does not consider a privy to be a 'sewerage system'. The Regulation defines a sewerage system as "a system for treating domestic sewage that uses one or more treatment methods and a discharge area, but does not include a holding tank or a privy"; therefore, a privy is not a permitted use for a sewerage system.

Provincial legislation does not apply to federal lands, therefore the provincial sewage legislation does not apply to any federal parks. For provincial parks there is a Memorandum of Understanding (MOU) in place that allows privies in provincial parks.

As outhouses are already restricted by Island Health, additions to the LUB are not required. Although if the LTC would like to amend proposed Bylaw No. 224 to prohibit outhouses/privies in all zones with the exception to parks, the LTC may consider following draft motion:

Draft Motion 1:

"That the North Pender Island Local Trust Committee proposed Bylaw No. 224, cited as "North Pender Island Land Use Bylaw No. 224, 2022" be amended by adding a new subsection to Section 3.2 'Prohibited in All Zones' as follows: "privies, except for in the National Park, Community Park 1, and Community Park 2 zones.".

2. Residential Outdoor Lighting

Outdoor lighting that creates a nuisance to neighbours cannot be regulated in a land use bylaw, but rather should be regulated by a nuisance bylaw. In the North Pender Island Local Trust Area, only the Capital Regional

District (CRD) has the authority by the *Local Government Act* to regulate or prohibit nuisances that disturb the peace.

Bowen Island Municipality adopted a night sky bylaw in 2010: "[Bowen Island Municipality Night Sky Bylaw No. 272, 2010](#)". As stated in the bylaw, the municipality is empowered by Section 64 of the *Community Charter* to enact a bylaw to regulate or prohibit the marking or causing of unnecessary outdoor light within the Municipality. The *Community Charter* does not grant this authority to regulate or prohibit outdoor lighting to the local trust committees.

3. 1200/1201 Port Washington Road

The LTC is requested to reconsider removing the rezoning of 1200 & 1201 Port Washington Road from proposed Bylaw Nos. 223 and 229. The subject properties are currently a site specific Commercial 1 C1(a) zone and the property owner is requesting to rezone the two properties to a site-specific Rural Residential 2 (RR2) zone that would only allow one dwelling within the zone. The rezoning could be deemed a community benefit as it would lead to the legalization of the parking for the Port Washington wharf. Rezoning the upland properties would have no impact on the Water 4 zone where the old shed extending onto the foreshore is located.

Draft Motion No. 2:

"That the North Pender Island Local Trust Committee proposed Bylaw No. 229, cited as "North Pender Island Land Use Bylaw No. 229, 2022" be amended to rezone 1200 & 1201 Port Washington Road to a site specific Rural Residential 2 zone that would only permit one dwelling within the zone.

4. 4606 Razor Point Rd – Boat Storage

A portion of 4606 Razor Point Road is currently zoned for a site-specific industrial zone to only allow boat storage. Proposed Bylaw No. 224, if adopted, would permit covered boat storage and accessory buildings and structures. This industrial zoned portion of the lot is currently in the Agricultural Land Reserve (ALR) and is in the process of having the ALR designation removed and including another portion of the property (NP-ALR-2019.1). As a condition of this inclusion/exclusion in the ALR, the Agricultural Land Commission (ALC) required the applicant to:

- the construction of a fence along the entire length of the north and west boundaries of the Proposed Exclusion Area;
- the planting of a vegetative buffer along the entire length of the north and west boundaries of the Proposed Exclusion Area; and,
- the submission of a survey plan delineating the area to be excluded from the ALR.

Staff have confirmed with the applicant that all three items are complete and they are waiting for a response from the ALC.

Staff also reviewed the minutes of the August 13, 2022 Special Meeting as questions were raised if the LTC had intended to also permit accessory uses on this property. After reviewing the video recording of this meeting, staff can confirm the minutes of the August 13, 2022 were recorded correctly.

5. 3334 Port Washington Rd - NP-TUP-2020.1 (Bigham)

The storage and wholesale of aggregates, soils and mulch has been a continued use over the past eight years by issuance of multiple Temporary Use Permits (TUPs) on the southern portion of 3334 Port Washington Road (see Figure 1 – subject property in yellow). Staff recommend the LTC legalize the uses permit by TUP and rezone a portion of 3334 Port Washington Road from Rural to a site-specific General Industrial zone to allow the uses

permitted by the TUP. The property is currently designated Industrial in the OCP therefore an OCP amendment would not be required.

Draft Motion No. 3

“That the North Pender Island Local Trust Committee proposed Bylaw No. 224, cited as “North Pender Island Land Use Bylaw No. 224, 2022” be amended to rezone 3334 Port Washington Road from the Rural Zone to a site-specific General Industrial zone to allow on the uses permitted in NP-TUP-2020.1.”

The LTC also may want to consider rezoning one of the site-specific industrial properties to allow all the uses in the General Industrial (GI) Zone in proposed Bylaw No. 224. The benefit of this is that it would allow a number of light industrial uses which creates flexibility and options for industrial business owners and operators.

6. Driftwood Centre – Commercial 2 Zoning

This item was added to the staff report to act as a topic to bring forward for the newly elected LTC. The portion of the property is zoned a site-specific Commercial 2 g (C2(g)) that would permit all uses in the Commercial 2 zone except for Tourist Accommodation use. A campground and accessory uses would still be a permitted.

7. MacKinnon Road – Commercial 2 Zoning

The proposed density for the four Commercial 2 zoned parcels on MacKinnon Road are shown below in Figure 2. The LTC proposed to reduce the density further, but upon receiving a site plan from the property owner of 1329 and 1333 MacKinnon Road, the LTC agreed to retain the density as outlined in proposed Bylaw No. 224 (density in red below). The property owners for the Commercial 2 zoned lots will be invited to the February 25, 2023 Special Meeting.

Figure 2 – MacKinnon Rd C2 Density

Property	Lot Area (ha)	Current Density as per Bylaw No. 103	Proposed Density agreed to by Property Owners and LTC (as shown in proposed Bylaw No. 224)	Proposed reduction at Aug 11/22 meeting (motion was rescinded)
1325 MacKinnon Rd	0.56	9	3	3
1329 MacKinnon Rd	1.23	26	15	7
1333 MacKinnon Rd	0.57	10	5	5
1349 MacKinnon Rd	0.75	10	8	3

8. Farm Buildings in RR zone – Legal Opinion

The legal opinion regarding the farm building on 4218 Clam Bay Road and the proposed amendments in Bylaw No. 224 is on hold until after April 1, 2023. The Director of Local Planning Services has placed a hold on non-essential legal expenditures due to budget concerns for this fiscal year. Staff will follow up with this legal opinion in April 2023.

9. Subdivision Regulations

The subdivision regulations in proposed Bylaw No. 224 have been updated based on the recommendations from the Groundwater Sustainability project. The Senior Planner working on the Groundwater Sustainability Project identified a few additional amendments to the subdivision regulations. Those amendments will be presented to the LTC at a later date as part of the Groundwater Implementation Project.

10. Minor Amendments

The following are minor amendments recommended by staff:

- i. Add the definition ‘compost facility’ to proposed Bylaw No. 224
“That the North Pender Island Local Trust Committee proposed Bylaw No. 224, cited as “North Pender Island Land Use Bylaw No. 224, 2022” be amended by adding the following definition to Section 1.1: “Composting facility” means the use of land, buildings or structures for processing organic matter through the biological decomposition of organic materials in accordance with the Environmental Management Act, Public Health Act, Organic Matter Recycling Regulation, and the Capital Regional District Composting Facilities Regulation Bylaw.”
- ii. To allow for a boat storage structure on the upland Magic Lake area to be rezoned from Rural Residential 1 to a site specific Community Park 2 zone as requested by the Pender Island Parks and Recreation Commission.
“That the North Pender Island Local Trust Committee proposed Bylaw No. 224, cited as “North Pender Island Land Use Bylaw No. 224, 2022” be amended by adding a site-specific zoning Community Park 2 a

(CP2(a)) that allows all the permitted uses in the Community Park 2 zone in addition to permitting ‘a structure to store non-motorized boats’.

“That the North Pender Island Local Trust Committee proposed Bylaw No. 229, cited as “North Pender Island Land Use Bylaw No. 224, 2022, Amendment No. 1, 2022” be amending Article 2.1(2) so it reads: “a portion of land northeast of Magic Lake from Rural Residential 1 (RR1) to site specific Community Park 2 a (CP2(a))” and subsequently amend Plan 2.”

COMMUNITY INFORMATION MEETING & PUBLIC HEARING

A Community Information Meeting (CIM) is scheduled for February 25, 2023 to collect further comments from community members regarding the proposed bylaws. If no further amendments are required at that meeting, staff recommend the LTC pick a date for the Public Hearing. A motion is not required as the LTC gave direction in September 2022 to staff to schedule public hearings for proposed Bylaw Nos. 223, 224, and 229. The final CIM and Public Hearing should be a stand-alone Special Meeting on a Friday or Saturday in April or May.

- (9) If a parking area is provided in respect of a *home business* or industry and the parking area abuts a *lot* on which a residential *use* is permitted, the parking area must be screened by a *landscape screen* complying with Section 3.9.

7.2 Design Standards

- (1) Each required off-street parking space must be a minimum of 2.6 metres in width, and a minimum of 5.5 metres in length, exclusive of access drives or aisles, ramps, columns, or similar obstructions, and have vertical clearance of at least 2 metres. For parallel parking, the length of the parking spaces must be increased to 7.3 metres except end spaces, which must be a minimum length of 5.5 metres.
- (2) Manoeuvring aisles must be a minimum of 7.3 metres wide for 90 degree parking, 5.5 metres wide for 60 degree parking, and 3.6 metres wide for 45 degree parking and parallel parking. Where parking is directly off a lane, the lane may be considered part of the aisle and in such cases the combined width of the aisle and parking spaces must be a minimum of 12.8 metres.

- (3) Each parking space provided under Subsection 7.3(1) must have a width of at least 3.7 metres; be clearly identified for use only by persons with disabilities; and be located so as to provide the most convenient access to an accessible building entrance or, if the parking area serves several premises, so as to provide equally convenient access to all such premises.
- (4) Adequate access to and exit from individual parking spaces must be provided at all times by means of unobstructed manoeuvring aisles.
- (5) Any lighting must be so arranged as to direct or reflect the light exclusively on the parking area at illumination levels of 11 Lux or less.

7.3 Calculation

- (1) If a *use* requires more than 30 parking spaces, one additional parking space for persons with disabilities and one space for a pick up/drop off area must be provided.

7.4 Number of Off-Street Parking Spaces

- (1) When any new *use* of land or *buildings* or *structures* takes place or when any existing *use* of land or *buildings* or *structures* is enlarged or increased in capacity, provision must be made for off-street vehicular parking spaces in accordance with the standards set out in this section.
- (2) The number of off-street parking spaces required in respect of particular *uses* is set out in Table 7.1, and where a particular *use* is not listed the number required for the most similar listed *use* applies.

PART 8 SUBDIVISION REGULATIONS

8.1 Lot Area Calculations

- (1) Subdivisions must comply with the minimum and average *lot* area regulations set out in Part 5 of this Bylaw except that a park to be dedicated upon deposit of the subdivision plan need not comply with those regulations and the Approving Officer may approve a subdivision creating a single *lot* not complying with those regulations if the owner grants to the North Pender Island Local Trust Committee a covenant restricting the use of the *lot* to park use. For the purposes of this Bylaw, the average *lot* area is the sum of the gross areas of the proposed *lots* divided by the number of proposed *lots*, subject to Subsection 8.1(2).
- (2) If an owner of *lot* being subdivided dedicates as parkland more than 5 percent of the land being subdivided, the area greater than 5 percent may, for the purpose of determining compliance with average lot area regulations set out in Part 5 of this Bylaw, be included in the total area of *lots* being created, and the park or parks are deemed not to be *lots*.
- (3) No lot having an area of less than 16 hectares may be subdivided under the *Local Government Act* to provide a residence for a relative of the owner unless the lot is entirely within the Agricultural Land Reserve.

8.2 Exemptions from Average and Minimum Lot Area Requirements

- (1) The average and minimum *lot* areas specified in Part 8 do not apply:
 - (a) if the *lot* being created is to be used solely for the unattended equipment necessary for the operation of facilities referred to in Subsection 3.1(5) and 3.1(6) of this Bylaw or for ambulance or fire protection facilities, a community sewer system, a community gas distribution system, a community radio or telephone receiving antenna, a radio or television broadcasting antenna, a telecommunication relay, an automatic telephone exchange, an air or marine navigational aid, or an electrical substation or generating station, and the owner grants a covenant complying with Subsection 2.6(1) of this Bylaw restricting the use of the *lot* to that use and prohibiting residential and manufacturing uses on that *lot*;
 - (b) if the *lot* being created is for park use, and ecological reserve, or dedication to the Crown;
 - (c) to the consolidation of two or more *lots* into a single parcel; or,
 - (d) to a boundary adjustment subdivision, provided that the subdivision would not increase the area of any *lot* to the point where the new *lots* created could be subdivided into more *lots* than would be permitted under this Bylaw without the boundary adjustment.

8.3 Covenants Prohibiting Further Subdivision and Development

- (1) If a subdivision is proposed that yields the maximum number of *lots* permitted by the applicable minimum and average *lot* areas specified by this Bylaw, and one or more of the *lots* being created has an area equal to or greater than twice the applicable average *lot* area, the applicant must grant a covenant complying with Subsection 2.6(1) of this Bylaw in respect of every such *lot*, prohibiting further subdivision of the *lot* and prohibiting construction, erection, or occupancy on the *lot* of more than one *dwelling* and, if a *cottage* is a permitted use of the *lot*, more than one such *cottage*.
- (2) If a subdivision is proposed that yields fewer than the maximum number of *lots* permitted by the applicable minimum and average *lot* areas specified by this Bylaw, and:

- (a) one or more of the *lots* being created has an area equal to or greater than twice the applicable average *lot* area; and
- (b) one or more of the *lots* being created has an area less than the applicable average *lot* area;

the applicant must grant a covenant complying with Subsection 2.6(1) of this Bylaw in respect of every *lot* referred to in Article 8.3(2)(a) prohibiting:

- (c) the subdivision of the *lot* so as to create a greater total number of *lots* by subdivision and re-subdivision of the original *lot* than would have been created had the first subdivision created the maximum number of *lots* permitted by the applicable minimum and average *lot* areas specified by this Bylaw; and
 - (d) the construction, erection, or occupancy on the *lot* of *dwellings* and, if permitted by this Bylaw, *cottages* so as to create greater density of such development on the original *lot* than would have been created had the original *lot* been developed to the greatest density permitted by this Bylaw.
- (3) If the approval of a bare land strata plan would create common property on which this Bylaw would permit the construction of a *dwelling* or *cottage* if the common property were a *lot*, the applicant must grant a covenant complying with Subsection 2.6(1) of this Bylaw in respect of the common property prohibiting the further subdivision of the common property, the construction of any *dwelling* or *cottage* on the common property, and the disposition of the common property separately from the strata *lots*.

8.4 Boundary Adjustment Subdivisions

- (1) The Approving Officer must not approve a boundary adjustment, which would increase the area of any *lot* to the point where the new *lots* created could be subdivided into more *lots* than would be permitted under this Bylaw without the boundary adjustment unless the applicant grants a covenant complying with Subsection 2.6(1) of this Bylaw in respect of every such *lot*, prohibiting further subdivision of the *lot*.

8.5 Lot Frontage and Lot Shape

- (1) The frontage of any *lot* in a proposed subdivision must be at least 10 percent of its perimeter, provided that in no case may the frontage be less than 20 metres.

Information Note: *The minimum frontage established in Section 512 of the Local Government Act is 10% of the perimeter of the lot. The Local Trust Committee has jurisdiction to exempt a lot or a subdivision from this requirement.*

- (2) If a panhandle *lot* is not capable of being further subdivided under the provisions of this Bylaw, the minimum width of the access strip at any point must be 10 metres.
- (3) If a panhandle *lot* is capable of being further subdivided under the provisions of this Bylaw, the minimum width of the access strip at any point must be 20 metres.
- (4) No *lot* shall have an average depth greater than three times its average width, except where otherwise specified in the *Zone* regulations.

8.6 Split Zoned Lots

- (1) The creation of an additional *lot* lying within two or more *zones* is prohibited.
- (2) If a *lot* proposed to be subdivided is divided by a *zone* boundary, a separate calculation of the number of *lots* permitted must be made for each portion, and no *lot* may be created in respect of any fractional area resulting from such calculation.
- (3) A boundary adjustment subdivision resulting in a *lot* lying in two or more *zones* is prohibited except where the *lot* being subdivided is located in two or more *zones*.

8.7 Split or Hooked Lots

- (1) No *lot* that is divided into two or more portions by a *highway* or other *lot* may be created by subdivision.

8.8 Double Frontage Lots

- (1) No *lot* having frontage on more than one *highway* may be created by subdivision, unless it is a corner *lot*.

8.9 Water Access Subdivisions

- (1) *Highway* access must be provided to every *lot* created by subdivision on North Pender Island.
- (2) If a subdivision with water access only is approved on an island other than North Pender Island within the North Pender Island Local Trust Area, the owner of *lot* being subdivided must provide motor vehicle parking spaces in accordance with Part 7 of this Bylaw for each *dwelling* and *cottage* permitted by this Bylaw in respect of each *lot* being created. Such parking spaces must be located at the most reasonable location giving access by water to the subdivision.

8.10 Public Access to Water Bodies

- (1) The Approving Officer may require that *highways* giving access to the shore of any body of water, dedicated to the Crown at the time of subdivision, be consolidated into one or more larger areas and should require that such a *highway* be located in an area of high recreational value or so as to provide access to such an area.

8.11 Highway Standards

- (1) The purpose of the standards set out in Subsections 8.11(2) through 8.11(10) is to ensure that the construction of roadways in connection with the subdivision of land does not result in the alteration of the land to an extent that is inconsistent with the object of the Islands Trust under the Islands Trust Act, the Islands Trust Policy Statement, or the North Pender Island Official Community Plan.
- (2) Proposed roadway centreline and pedestrian path locations must be surveyed and flagged at maximum 15 metre intervals prior to subdivision application to facilitate inspection by the Approving Officer. No trees or other vegetation may be removed from the highway right-of-way prior to application and inspection by the Approving Officer.

- (3) No trees or other vegetation may be removed from the right-of-way without written permission of the Approving Officer, and in no case may trees or other vegetation be removed beyond the extent of earthworks directly required for the construction of the roadway.
- (4) No obstructions of any kind, including utility poles and hydrants, may be located within 1.5 metres measured horizontally of the edge of the shoulder of the roadway.
- (5) All culverts must be provided with local rock head walls to the height of adjacent shoulders. Head walls may be dry stone or set in mortar provided sufficient stability under water runoff is assured. Culverts must be adequately sized to carry 20 year estimated flows with a minimum diameter of 300 mm at driveways and 400 mm under intersecting roads.
- (6) Fragmentation of land in any Agriculture (AG) Zone by roads or other service corridors is prohibited.
- (7) No roadway may be located or constructed so as to connect North Pender Island to any other island except South Pender Island.
- (8) No roadway may be located so as to divert the flow of a surface watercourse or divert or contaminate in any way a groundwater aquifer, but this subsection does not prohibit the culverting of a surface watercourse for a roadway crossing or the construction of a stormwater retention facility provided that such culverting or construction is in accordance with the "Standards and Best Practices for Instream Works", the *Water Sustainability Act*, and the *Fisheries Act*.
- (9) The design of roadways must to the greatest extent possible follow the natural contours of the land so as to minimize the extent of cutting and filling required to construct the roadway.
- (10) Native vegetation must be reinstated in all portions of a highway not comprising the roadway, following the completion of construction of a roadway and any associated utilities.

Information Note: For information on road standards see the Letter of Agreement between the Islands Trust and the Ministry of Transportation and Highways, dated October 20, 1992 and amended July 18, 1996.

8.12 Water Supply Standards

- (1) Each lot in a proposed subdivision must be supplied with sufficient *potable* water to supply the uses permitted on the *lot* by this Bylaw according to the standards set out in Table 1.

TABLE 1 POTABLE WATER SUPPLY STANDARDS FOR SUBDIVISION	
USE	VOLUME (per day per lot)
<i>One Dwelling and one Cottage</i>	2000 litres
<i>Each additional permitted dwelling</i>	2000 litres

Information Note: *If more than one dwelling is connected to the same source of water, the water system may be subject to the Drinking Water Protection Act, the Water Utility Act or other regulations pertaining to water supply systems.*

Information Note: *Water obtained from a stream, or non-domestic groundwater use requires a licence under the Water Sustainability Act.*

- (2) Where *potable* water is to be supplied by a *community water system*, the *community water system* must provide written confirmation that it is able to supply *potable* water for the uses specified in Table 1 to each *lot*.
- (3) Where *potable* water is to be supplied from a stream, the applicant for subdivision must provide proof of authorization (water licence) indicating the total volume of water granted to the licence holder confirming that it is able to supply *potable* water for the volume specified in Table 1 to each *lot*.
- (4) Where a lot proposed to be subdivided contains a non-domestic use that requires a licence under the *Water Sustainability Act*, the applicant must provide proof of authorization (water licence) indicating the total volume of water granted to the licence holder confirming that it is able to supply water for the non-domestic use, as well as *potable* water for the volume specified in Table 1 to each *lot*.
- (5) In the absence of a water licence, where *potable* water is to be supplied by a drilled well, a *pumping test* shall be carried out on each well in a proposed subdivision by:
 - (a) pumping *groundwater*, at a constant rate, for a minimum period of 12 hours;
 - (b) withdrawing the total daily required volume specified in Table 1 over a maximum period of 24 hours; and,
 - (c) monitoring *groundwater* levels continuously during the *pumping test* and during the recovery period.
- (6) Where *potable* water is to be supplied by a drilled well in accordance with Subsection 8.12(5), a sounding tube or wellhead port must be installed to enable the insertion of water level monitoring equipment.
- (7) Drilled wells used for the purposes of subdivision application must not be located within 50 metres of the *natural boundary* of the sea.
- (8) Where *potable* water is to be supplied by a drilled well in accordance with Subsection 8.12(5), the applicant for subdivision must provide written certification under seal of a *Hydrogeologist* that:
 - (a) each well has been constructed in accordance with the Groundwater Protection Regulation;
 - (b) each well has been constructed in accordance with Subsections 8.12(5) and 8.12(6);
 - (c) each well has sufficient available *groundwater* to provide the daily required volume of *potable* water for each *lot* in accordance with Table 1; and
 - (d) includes recommendations for mitigation measures, if applicable, to ensure long-term sustainable yield of the drilled well.
- (9) If the daily required volume of *potable* water cannot be supplied in accordance with Subsection 8.12(2) or if the certification referred to in Article 8.12(8)(c) cannot be made, the applicant must grant a covenant under the *Land Title Act* to the North Pender Island Local Trust Committee

that restricts the development of the subdivision to the uses for which there is a sufficient volume of water.

- (10) Where the potable water supply is provided through a drilled well or water licence, a *Hydrogeologist* must also provide:
- (a) results of a water quality analysis, completed by an accredited laboratory;
 - (b) a plan of the proposed subdivision indicating the location where each water sample was taken;
 - (c) a statement that the water samples upon which the water quality analysis was performed were unadulterated samples taken from the locations indicated on the plan;
 - (d) confirmation, based on the accredited laboratory water quality analysis, that the proposed water supply source is *potable*, or can be made *potable*, with a treatment system; and,
 - (e) confirmation, based on the accredited laboratory water quality analysis of chloride concentrations, that the drilled well is not likely to be affected by the intrusion of saline *groundwater* or sea water in accordance with the Province of British Columbia guidance documents;
- (11) If the water to be supplied is not *potable*, but can be made *potable* with a treatment system, the applicant must grant a covenant under the *Land Title Act* to the North Pender Island Local Trust Committee that requires on-going treatment of the water to *potable* water standards.
- (12) For the purposes of subdivision, drilled wells impacted by seawater intrusion or whose operation is likely to cause seawater intrusion are not permitted sources of *potable* water.
- (13) For the purposes of subdivision, alternative *potable* water supplies including, but not limited to, shallow dug wells, rainwater catchment and desalination are not permitted sources of *potable* water.
- (14) Subsections 8.12(1) through 8.12(13) shall not apply where the proposed subdivision is a boundary adjustment that does not result in an increase in the number of *lots* or permitted *dwellings*, provided that all *lots* in the subdivision are currently serviced by existing wells, *community water* system connection or water licence.

8.13 Sewage Disposal Standards

- (1) Each *lot* that is proposed to be created by subdivision must be demonstrated by the applicant to contain an area or areas of sufficient size and appropriate characteristics to satisfy the requirements of the Sewerage System Regulation under the *Public Health Act* for conventional septic tank or package treatment plan sewage disposal systems in respect of the *buildings*, *structures* and uses that are permitted on the lot by this Bylaw, if no other acceptable septic system is available.
- (2) The information referred to in Subsection 8.13(1) must be provided to the Building Inspector where an application for a building permit is made and the information has not previously been provided in respect of the subdivision of the *lot* on which the *building* is proposed to be constructed, except that the information need only be provided in respect of the *building* or *structure* that is the subject of the permit application.
- (3) No sewage may be disposed of by means of discharge to a watercourse or the sea or, in the case of a residential zone, on a *lot* other than that on which it was generated, except where that *lot* is used only for the purpose of sewage disposal.

8.14 Drainage Standards

- (1) Every subdivision must be designed and constructed so as to maximize the proportion of precipitation, which is percolated into the ground and to minimize direct overland runoff.
- (2) Every surface drainage system must be designed to provide for the continuity of any existing surface drainage system serving the drainage basin in which the lot to be subdivided is located.
- (3) No watercourse or water body may be diverted, altered or used for surface drainage purposes so as to transfer water between watershed basins.
- (4) Every surface drainage system must be designed so that the system is capable of conveying the peak rate of runoff from a 10 year storm for the entire drainage basin within which the subdivision or development is located when such basin is fully developed.
- (5) Every surface drainage system must be designed and constructed so as to minimize scouring and erosion of ditch banks.
- (6) All drainage works, ditches, culverts and appurtenances must be located in statutory rights of way granted to the Crown, or in dedicated *highways*.
- (7) If storm water is discharged from a surface drainage system to the sea or a watercourse on or adjacent to the *lot* being subdivided or developed, the system must be constructed and designed to retain storm water for the period of time necessary to allow for the settling of silt and other suspended solids.
- (8) To the extent that is practicable, surface drainage systems must be designed so as to permit withdrawal of water for fire suppression from storm water retention facilities and drainage ditches, and the use of storm water to recharge fire protection cisterns.
- (9) Every applicant for subdivision must provide the written certification under seal of an Engineer with experience in storm water management that the drainage system for the subdivision has been designed in accordance with Subsections 8.14(1) to 8.14(8).
- (10) The certification required in Subsection 8.14(9) must be provided to the Building Inspector if an application for a building permit is made and the certification has not previously been provided in respect of the subdivision of the lot on which the building is proposed to be constructed, and the provisions of Subsections 8.14(1) through 8.14(8) apply with the necessary changes, except that the certification need only be provided in respect of the *lot* that is the subject of the permit application.
