**Subject:** First Draft of New Policy statement Bylaw of the Islands Trust

Dear sir:

Having read the above, I would like to applaud the vision and work that went into its execution. However, I have one caveat: the loss of the wood burning stove that would continue to provide heat during power outages, which occur with some regularity in this part of the province, especially in late fall and early winter. Pollution remains very local. We will be bringing this up at the first reading, in the hope that we may hear some reasoned response.
