Subject: Worried what is happening

Developing our Gabriola property since early 1960 and now having restrictions and taxes beyond our means is not right! We have almost 10 acres with some old growth which we have taken care of over these many years. To get approval and pay for cutting our trees would be next to impossible for us. Island Trust should not have these powers. We elect our provincial government to set taxes and regulations. I know most of you mean well but please be reasonable.

George MacLean.
