**Subject:** My opinion

I strongly feel that islands trust has way to much say about property owners on the islands!! do not think I should have to get a permit to fall a tree for whatever reason a danger tree to my home or for fire wood or to better my view.I feel we're being taxed more and island trust is spending it foolishly to please newcomers wanting street lights etc.island trust needs to allow home owners to have a small trailer in the backyard if set up properly or rent out space in our homes to a working person.there is lots of work but very little affordable places to rent.with the world changing its more expensive to live a garden or chickens helps tremendously!why should islands trust have a say where I grow it on my property or how I water it !my home is supplied with a well we make sure we don't over use it, we collect rain from our gutters there still plenty of rain landing on the ground but you want to stop us from doing that? I feel my land taxes have been raised enough!quit spending my hard earned money on things that we can live with out save some of the budget for another year .why prohibit waterfront people of having private docks?it's absurd we live on islands out in the middle of the sea it's beneficial to have a boat tied up for emergencies when our blessed ferry system starts cancelling a our road way.Island trust you need to step back and allow other parts of Canadas government to do their jobs and quit trying to take over. Thks for my opinion regards p reid
