RE: Concerns with the impacts of the Proposed Policy Revisions on my Career and Ability to Feed my Family

I have lived and worked on Salt Spring Island since 1980.

We value a rural lifestyle to raise my family; where my kids could grow up in nature.

The Islands Trust has misunderstood the Preserve and Protect mandate as being more important than the people of the islands. Livelihoods and our economy need to be supported.

The current 1994 Trust Policy Statement should not be eroded on its recognition and support of a our livelihoods and community. Rather, economic and social/cultural need to continue to be in balance with environmental concerns. Please ensure that the intent and wording of Section 5.8 Health and Well-being (now in the current 1994 Policy Statement) is not removed from the revised policy statement. The revised section 3.1.9 does not, in any way, adequately cover the original intent of our 1994 policy statement.

It is clear that the current policy statements gives the community a primary voice in the policies that affect our community.

The proposed policy revisions threatens my ability to earn a living and support my family. I do not support the proposed changes to the policy statement.

RE: As a Service Contractor, I Urge You to Abandon the July 15th Policy Statement Revisions and Start Again!

I have lived and worked on Salt Spring Island since 1961.

I have had a FARM business on the island for 1979 years.

Our small island economies and jobs need support to survive. The policy revisions will put us out of work.

Please ensure that the intent and wording of Section 5.8 Health and Well-being (now in the current 1994 Policy Statement) is not removed from the revised policy statement. By removing sections 5.8.1. to 5.8.5 of the current policy statement, you are removing our democratic rights to have a say in our governance and community. The revised section 3.1.9 does not, in any way, adequately cover the original intent of our 1994 policy statement.

Service contracting work should be considered an essential service for our islands and given high priority while having consideration for other public objectives.

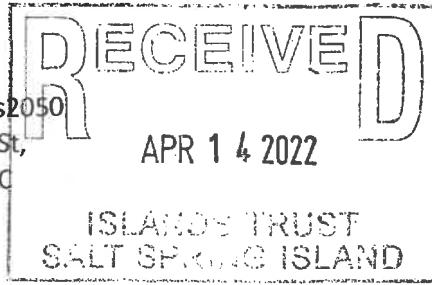

The revised policy statement is fundamentally flawed. As the current policy statement suggests, the Islands Trust MUST take our concerns into consideration. Go back and start again!
