Subject: ALR is too important to leave out of your new

Please keep on designating agriculture as "a traditional and valuable activity in the Trust Area".

My understanding is the Islands Trust was set up to preserve and protect the environment and rural character of the islands between Vancouver Island and the mainland.

Maintaining a focus on agriculture to value you and preserve it is important to ensure the mandate. Yes protecting the environment and still extant natural habitats - is as, if not more important.

kind regards

Allison Mills
