Subject: Trust Policy Statement

With regards to the Trust Policy Statement, I urge the Trust to:

- strengthen the TPS to specifically protect the natural environment of the Trust islands as intended by the legislators who designed the Islands Trust Act to prevent over development of the Islands Trust area.
- clearly define the word “environment” as it appears throughout the TSP as meaning the **natural** environment.
- clearly state that the directive policies in the TPS be required in **all cases**.
- limit growth to affordable housing with binding agreements to insure affordability.

Thank you,

Erna Robertson
