Subject: Draft TPS recommendations

I strongly endorse the following recommendations of "Positively Forward":

- That the draft TPS be strengthened to specifically protect the natural environment of the Trust islands as intended by the legislators who designed the Islands Trust Act to prevent over development of the Islands Trust area.
- That the TPS define the word "environment" as it appears throughout the document as meaning the natural environment.
- That the directive policies in the TPS be required in all cases.
- That growth be limited to affordable housing with binding agreements to assure affordability.

Respectfully,

John Moore
