Subject: Re: What do you think about Values and Climate Change?

Your communications are excellent.

Thirty years is an important time period to aim for, but what can be achieved in the next five years is of interest to me.

I am concerned about the following items and would like to see some action:

- a) Tourism is a double-edged sword...it needs controlling...especially with regards to water, roads, short-term rentals, and enabling low paid workers to rent affordable properties.
- b) Community: the increasing upgrading of small abodes to mega houses that are often left unused for most of the year does not engender community.
- c) Further financial incentives to groups that can show they are contributing to our community.

Good luck. We are happy to have such fine Trustees!

Barry
