Subject: re Future mandate of the trust

I am writing as a private citizen living on Gabriola Island. I am dismayed that the Trust is considering reducing their mandate to just the environment. Seems to me what is needed now more than ever are examples of communities living in harmony successfully. The conversations members of our communities have regarding development and protection both the environment and of safe places to live and work are important demonstrations that we can continue to innovate and share stewardship of the land. I support the Trust moving forward boldly into the future standing and working for both protecting land and people. Thank you for the work you do. Brenda Fowler
