Subject: Non Support of Expansion of Islands Trust Authority proposed in the Trust Policy Amendments

Dear Islands2050:

The Islands Trust has expanded into areas where they should not be in. In the amendments to the Trust Policy Statement, expansion of authority over private docks which are already fully regulated at higher levels of government, is not needed. There is currently a groundwater study being undertaken on Pender Island taking up valuable staff resources while the core mandate of the Islands Trust, which is land use regulation and advocacy, is not being managed.

I do not support the proposed Trust Policy Statement amendments which expand the mandate and authority of the Islands Trust.

Respectfully,
Juanita Evans
North Pender Island
