Subject: Comments on the Islands Trust Draft New Policy Statement

Dear Trustees

My biggest concern with the changes are that they will result in increased bureaucracy and duplication of efforts; with minimal gains.

I support the reconciliation amendments.

I commend you for the inclusion of sections 4.6.7 and 4.6.18 on freighter anchorage sites and the prohibition of oil tankers – I support the intent; but don't understand how this can be policy when all you can do is advocate to higher levels of government for action.

In principle, I support the concept of more affordable housing and share your concerns around climate change; but by including these in your policy statement are you not just adding another level of government and causing unnecessary duplication.

Caroline Bailey
