Subject: Sheep

I would like to put my 2 cents in:

I agree with supporting maintaining a sheep population with some input on population size. Though it has been maintained as it is for over 100 years, so if it is an invasive species we are doing pretty well with it I think. Definitely we should have serious thought and consideration before we move to ELIMINATE them! What Brigitte said on the e-mail list makes sense to me:

...should encourage studying and documenting everything we as a community value and don't value about the sheep in a holistic way, rather than singling out the invasive species perspective.

Thanks -Laurene Fisher
