I believe we should change the wording in our proposed OCP with respect to our feral sheep. The old/current OCP declares that we should preserve these sheep whereas the proposed OCP in calling for “studying the ecological impacts of the sheep as an invasive species” seems to be biased toward a negative perception of our sheep. I believe the relevant section in the OCP should encourage studying and documenting everything we as a community value and don’t value about the sheep in a holistic way, rather than singling out the invasive species perspective.
