Lasqueti Island Trust committee Friday August 13, 2001

I would like to register the following comments with the committee with regard to the CIM of our Lasqueti OCP. I attended all OCP meetings and was part of all discussions on how to articulate the islands conflicting ideas about how to word our island position on the continuing existence of the feral sheep on Lasqueti. There was no disputing that these sheep have become a heritage population and are an important possible food source on the island. The majority of the people attending the OCP meeting believed that the population should be 'preserved'. I believe the the wording change in the "revised" OCP has complicated our majority opinion on protecting and controlling our sheep population. I encourage the island trust committee to change the language of the OCP back to the wording " To preserve and support balanced control of the local feral/heritage sheep which are a valued part of the community and its history"
