Subject: For May 29 th meeting re Port Washington

Hi Aaron , Deb & David,,

I am requesting that a water sample be done specifically from the well that's in Braesdon's industrial yard , not just a well 1/2 km away, in order to provide a baseline of environmental monitoring.

This concern pertains to making sure our water on Port Wash continues to be potable . Taking into consideration the wetlands / valley and stream that houses many wildlife, not to mention our wells along Port Wash.Im not able to attend tomorrows meeting so please pass on my concerns.

Sincerely
Janet Fletcher
