**Subject:** LTC Meeting re: the Tower

Hello Team Trustees,  
We appreciate all the aspects of your responsibility.

We also must remind you of the healthy lifestyle and our communities love for that rural, small town feel that is Salt Spring Island.

For that reason we ask you to show the highest level of discernment prior to approving any tower structure that has the possibility of creating radiation that is not safe.

I'm concerned for your liability in regards to your decision. There is ample proof the soils, water, animals, including humans all have detrimental effects from this type of radiation

Regards

Carlos & Satiya
