Subject: Cell Tower

To whom it may concern,

I am emailing as an SSI community member about my concern with the proposed new cell tower in town. I and many other community members are opposed to this project. There are many known health concerns for humans and wildlife linked to 5G cell towers and potentially more long term consequences to our health that we are yet unaware of. We urge you to please reconsider. We are content with the spotty cell service on our quant little island.

Some information for you to consider...
