**Subject:** Stop cell project SSI!!

To Whom this concerns

I live on Salt Spring Island and we're becoming aware of this pretty massive cell tower etc being installed within short distance of parks, two schools and a recreation centre!! Not to mention an entire town filled with tourists, residents and homes.

Wondering where your heads are at in even thinking you should do this and not give a care or concern for the fallout from it!!!!

This draconian way in this province with just about no regard for the humans that make it all happen needs to be checked, you're just trying to move your agendas forward with no regard for us and I'm pretty sure palms are taken care of and someone stands to lose money if this doesn't go forward.

It's time to look up kids and see the damage you just blindly inflict. Stop it!!!
