Subject: Please Add to Agenda of Thursday, Nov 6 meeting: Concerns Regarding Proposed Cell Tower

Hello respected trustees:

Many members of my family suffer significant ill health effects from electromagnetic fields. I know that we are not alone in being negatively impacted by the rapidly expanding communication technologies that are adding new exposure at alarming rates. The addition of a new cell tower in the central Ganges area will be harmful to many people. Please do not give permission for this development.

Thank you,
Naomi Adamson
