Thank you for your email. It is my hope that this bylaw will not cause barriers to the people who want to make this form of housing available.

Laura

Hi Laura

I am writing in support of the proposed Bylaw 530. I expect the bulk of the input you will get is from the usual naysayers (we call them the squeaky wheels), so here is me as one of the silent majority.

This bylaw seems to go a long way towards providing some of the critical housing needed; pity it will take a long time to actually provide this housing.

The point I want to make is, please don't make participation by potential landlords onerous; i.e. no zoning changes, no big fees, or we won't get many new dwellings. Any renovation or new construction is subject to building codes and inspections by the CRD and that should be enough as long as basic requirements such as water supply are met.

Respectfully,  
Sabine Swierenga
