Subject: Bill530 and Vortex Project

Good afternoon Trustees

The mandate of The Islads Trust is to prevent and protect!!It would seem that this has bee forgotten.Having lived on SaltSpring Island for [REDACTED] we can see and feel the erosion of our way of life.We can no longer say that you are doing your best.You are acting thoughtlessly and ignoring the advice of your staff and experts.The way you act now will forever affect the future of the Island.please re-think bill530 and do not go ahead with it.More housing does not mean more affordable housing for our workers As far as Vortex is concerned all advice says that this would forever sully the 2 fish bearing creeks and should never be even considered Every wrong decision has irreversible consequences for all living things Yours truly Eddy and Jan Jang
