Subject: Please support the Housing Task Force

Laura Patrick,

A lot of great work has been done in the past year to bring together strong voices with great ideas on the housing issue on our island home.

The proposal put forward to look at housing not just from the point of view of affordability but from the point of view of sustainability gets to the core of many converging issues at once.

Business as usual is not an option. And that means not getting stuck in NSSWD allotments. It means not getting stuck on rules about square footage for tiny homes. It means not getting stuck on believing that we can't help direct people who want to build large homes on cleared lots to much better options. If the Trust is to realize its mandate it must look at housing access, and housing footprints at once.

Thank you
Bryan Young
