Subject: Housing Working Report

Dear All,

I would like to add my call to the many on the island who wish to endorse and support the work of the Housing Working Group and their proposals in the September 1st LTC agenda package. They absolutely square with my beliefs of how to address a serious problem facing this island - the lack of affordable housing - within an environmentally sound and socially responsible framework.

Please give it close attention and help Salt Spring stay vital and diverse. If we lose the people who provide vital services because they can't afford to live here, we won't have a community in 20 years.

Thanks,

Chris Humphreys
