Subject: Housing Working Group Project

Dear Island Trust Members,

I am writing to you in support of the Housing Working Group proposal to examine housing solutions for Salt Spring. I believe it is very important to address housing as an integral part of finding solutions to climate change and its effects on our island. The Housing Working Group proposal emphasizes eco-system based management that would increase the quantity and quality of housing here, creating sustainable communities and ecosystems.

Please make this project a priority at your next meeting.

Sincerely,

Maureen Stephenson
