**Subject:** Integrative Solutions-oriented Housing Project.

We fully support the integrative solutions-oriented housing project. We believe that we can produce affordable housing on Salt Spring Island while supporting ecological, climatic and socioeconomic issues. Every day it becomes more evident that integrated solutions are feasible and urgently required.

We therefore ask that a Housing and Solutions project currently before the LTC be made a priority by you and given the required Staff time it requires to become a reality.

Tami and Fernando Dos Santos (Dragonfly Housing Society)
