Subject: Housing Solutions

Trust Committee,

I believe it is imperative that the Trustees immediately put Housing at the top of the list of priorities for your own attention, and give direction to the Planning Staff to do the same. The dedication of the various community housing groups, and particularly their joint cooperation and liaison with Trustee Laura Patrick will be an invaluable resource for and support to the Trust Staff to further this desperate need, all the while within the mandate of the Islands Trust to Preserve and Protect. I believe that mandate must include the preservation and protection of one of the basic human needs housing for people who choose to make this island their home and enrich our community with their contributions. The people in need of housing are the people who will add to our resourcefulness for the difficult years ahead ... people who may never be able to afford to own a house here, but who are and will become the backbone of our community.

Sincerely,
Wendy Kaye

Wendy Kaye Kaye
