Subject: Bylaw 122

Dear South Pender Trustees,

I would like the Bylaw 122 to be re-examined and discussed to understand why it was pushed through despite opposition of majority of South Pender residents.

Considering we face many significant issues directly related to global warming (water shortages and increased fire hazard), Bylaw 122 at the very best does not even qualify to be considered a minor project.

Our opinion is Bylaw 122 should be revoked.

Thank you for your consideration

Regards,

Nina and Kristof Subryan
