Subject: Next meeting about new projects

Thank you for having this meeting to get our input about setting your priorities for the future.

The main thing I think you should deal with is to Rescind Bylaw 122 in total. It is an albatross that is controlling our Island by its restrictive land use regulations. It has made many/most of us to be 'legal, non-conforming' in one or more ways. It feels like a smothering blanket that creates unwanted/unneeded controls with the only way out being through expensive, timely Development Variance Permits.

The recent election brought forward new options and new possibilities offered by the Trustee promises of 'listening to the community'.

Let's start fresh and 'Rescind Bylaw 122' in total and then move forward.

Respectively submitted,
Alma Lightbody
