Subject: Fwd: Projects

As per my email yesterday, following is our revised submission:

Dear Trustees,

You have asked the community for their ideas on which projects should take priority in the near future for the local trust committee. Wayne and I have given this thought and believe that the most important issue now is that Bylaw 122 should be rescinded or reviewed and amended according to the majority of the community's wishes. Kristina did a lot of work in the last term to survey property owners to see whether they agreed with two of the main changes to the bylaw – house size and setbacks – and a majority of the people surveyed did not want to see changes to Bylaw 114. It was also quite evident that the majority of the attendees at community information meetings and public hearings were against Bylaw 122. Even Chair Peter Luckham voted against Bylaw 122 because he could see that the majority of the community was not on board. Kristina and Dag both said in their campaigns that they would listen to the community. We really do not think that much more needs to be said. South Pender Island does not need to have such restrictive land use regulations compared to our neighbouring islands.

We urge you to move forward in accordance with the community's wishes.

Also, if this email needs to be sent to any other address, please forward it so that it becomes part of the public record.

Yours sincerely,

Heather and Wayne Haryu
